Assignment 4

Question: Upgrade the multi-page website developed in Assignment 3 for the college event by adding advanced styling and multimedia features to make it more engaging, interactive, and responsive. Implement multiple CSS selectors (element, class, ID, attribute, pseudo-classes, and pseudo-elements) for precise styling. Apply CSS Box Model properties (margin, padding, border) to improve spacing and layout structure.

- Use Flexbox for aligning and distributing content in key sections
- Design a responsive gallery using CSS Grid for displaying event images.
- Update home page to embed a video section showcasing highlights from previous events.
- Update the schedule page to include an audio message to greet or guide participants.
- Ensure the site is fully responsive and works smoothly across mobile, tablet, and desktop devices.
